Roundabout Complex Update – July 18, 2025

Huslia, AK - The Moldy Fire (#279) saw a third day of minimal fire behavior with no growth or movement to report. The Midnight Sun hotshot crew arrived yesterday to prepare and protect allotments in the southern division. The northern division is repositioning to protect allotments and other values to the north and east.

Moldy Fire (#279) – Today's objectives include mopping up and securing impacted allotments and locating and retrieving damaged equipment. A refueling mission in cooperation with the Goldrun Complex #904 is being coordinated. No changes to the evacuation levels were reported.

Caribou Fire (#128), Richards Fire (#251), Billy Hawk Fire (#182), and Billy Hawk 2 Fire (#191) – No changes reported. All four fires remain in monitor status with no new activity.

Start date: June 15, 2025

Cause: Lightning

Size: 75,083 acres

Completion: 12%

Resources: 2 Type 1 hand crews, 1 Medic, 9 Helitack 12 Overhead

Total personnel: 67

Fuels: Black Spruce, Tussock, Mixed wood, and Hardwood

Values at risk: The Village of Huslia, Alaska Native Allotments, Infrastructure

Smoke: Mild, damp conditions are expected to continue into the weekend, reducing smoke impacts. Smoke sensitive populations with specific health issues should limit outside activities during periods of smoke impacted air quality.

Safety: The health and safety of the public and our firefighters is always the highest priority.
